

InduSoft IoTView™

Your Data Collection and Visualization solution for Internet Of Things (IoT) and Industry 4.0

InduSoft IoTView™ enhances the intelligence of embedded devices on Linux and VxWorks

The surge for demand to embrace the Internet of Things and Industry 4.0 means an increase in the number of embedded devices used for data exchange. Are you poised to take advantage of these trends? InduSoft IoTView, EmbeddedView, and CEView, are here to make certain you have the capability to meet rising consumer demand for:

- Visualization of information, either locally or remotely via iPads, iPhones, Android (smartphones and tablets)
- Exchanging data with cloud-based systems or in-house databases
- User-friendly configuration and predictive maintenance
- Built-in HMI and database logging added to your existing controller or included with next generation embedded designs
- A communication gateway that allows many devices to interact seamlessly with one another
